Not worth the time. The graphics and physics are like a step backwards.. nah not for me, give the robot some baps and maybe.. Seemed like a neat idea, but I lost interest after only a few levels. Decent AI however, it's fun if you like indie games.. I purchased this route when it came out. The train was capable of ~346km/h max sped with awersome acceleration. Since the last game update, it barely can reach the max line speed and feels powerless. Takes away the excitement. Please change it back or compensate. Btw the cab sounds are one of the best and the scenery is well designed. One of my favourites and I recommend it.. I read one review, in which the player complained that the clues were too easy to come by. The way I saw this game, the point wasn't just to find clues - it's to follow the detective on his journey and choose the path he takes. I assume that most choices will eventually lead to him solving the mystery, but even if they don't, it's fun choosing which informant he speaks to next, which action he decides to take, etc. It's your classic choose-your-own adventure novel, and for me, it brought back tons of great memories from my childhood. I personally loved this game. And I loved the visuals. The artwork was amazing, and I thought the music was great too.

Best Elifoot ever.. I am NOT sure where to begin. I bought this game in hopes that a family member and I may play it together, that is NOT going to happen. I can not even get the game to actually start playing. The install errored, and after trying four times the game started up but in a small 800x600 (maybe) window. the opening screen, a Typhoon jet flying at differing camera views, will NOT stop playing. I am unable to start an actual game and control the airplane. Also, the graphics are on par with a Win98 game.

If you can buy this at 80% off ~and~ you feel like trying to troubleshoot the issues, give it a go. It "might" be some fun.. i think this is the only two worlds title that is actually nice, and the only tower defence i could actually enjoy.. Spend the first 6 minutes throwing planks at my friend, laughing my♥♥♥♥♥off.. money well spend. Nice idea but lacks complexity.

Possibly one of the most shallow tycoon type games ive ever played. You can pretty much unlock and have done everything within the first day. After that its just increasing the size of your business which seems to be free to do whatever it wants as theres no competition.

Somewhat disappointing.. Great game but i don't get all the little girls thing. A really nice and simple game! :D. Laggy as hell, I rarely get more than 30 FPS on minimum settings. Buggy as hell, I fell through the ground several times and had to reload an old savegame which made me replay about half an hour of gameplay which isn't very fun in a glitchy puzzle game with 20 FPS.

Weird riddles you don't even know you have to solve. Some riddles are broken; I couldn't solve the elevator code riddle in the beginning because it didn't give me the feedback you need to be able to solve it.

Hours of backtracking for objects you can barely see. I got stuck because I didn't pick up a bottle. As it turned out it was a bottle standing between 5 or 6 other bottles I couldn't pick up. I had to backtrack to pick up a small wooden handle lying on a wooden floor in the shadows.

Walkthroughs aren't helpful because this is the Director's Cut Edition which changes riddles and object locations.

There's an achievement "Find all 4 flashlights". After I fell unconscious I lost most of my inventory, including my 3 flashlights. When I woke up, I found my inventory in the other room - but only 1 of my flashlights. When I got back to the mansion and found the 4th one, it didn't trigger the achievement because I didn't have 4 flashlights at the same time. Great job.

Seriously, this game was so good in the beginning, but after a while you start noticing what a mess it is. Worse than the prequel.. Damnn really nice game it made me feel like im in space
